# Intelligent, Efficient, and Scalable Security for Pharmaceutical Companies

As the pharmaceutical industry strives to improve the lives of billions across the globe, its security needs are becoming increasingly more complex. From office buildings, to R&D labs, to manufacturing plants – pharmaceutical facilities all have unique risk profiles and face specific security challenges. The **HiveWatch® GSOC OS** allows pharma companies to connect their disparate global cameras and systems, automate compliance management, and keep their employees and assets safe.

## Product Highlights

- **One unified platform** regardless of disparate technologies and multiple geographic locations. Seamlessly add on new or inherited systems as the organization grows.

- **Automate compliance management, investigations, and audit trails** by pulling reports of access control data, guard patrols, and video feeds.

- **AI-enabled perimeter security** immediately alerts the right people when unusual behavior is detected in a no-man zone.

- **Temperature monitoring** through Guard Tour checkpoints or notifications.
